

## Universal keyhole escutcheon

### KG-KE

The KG-KE universal keyhole escutcheon is designed to fit most of the key sizes commonly found on the market today. Due to the clever design it can be fitted in all four directions and still offer free choice of key-hole orientation. This is very useful when retrofitting a safe or strong-room door and the door is pre drilled and tapped.

The system comprises of one base plate (1), three different centre inlays (2, 3 & 4) and a self-adhesive decorative label (5).

#### Mounting:

Simply align base-plate to existing fixing holes or drill and tap 2x M4. Pick the inlay best suited for the application. Inlay 2 is for S&G and FAS style keys, 3 is for Mauer, Stuv, CAWI etc. style keys and 4 is for LG and KG Group style keys. The material allows for easy modification of the key hole should there be some odd or obsolete style key. If inlay 4 is used with a KL39-07 lock there is a key-guide available to be ordered separately (order #: KE-G). Apply inlay in base-plate correctly aligned and fix to door. Check function and finish installation by applying the adhesive label to cover the screws.

#### Article numbers:

1. Base Plate- KE1
2. Inlay 2- KE2 (S&G, FAS...)
3. Inlay 3- KE3 (Mauer, Stuv, CAWI...)
4. Inlay 4- KE4 (KG Group, La Gard)
5. Adhesive Label- KE-AL
